Department of Botany

Rock photographs

Tom Soderstrom just pointed out a library card, call number 581.951 R68 for Rock "Photographs of Chinese Plants" Washington 1944 described as:

"2 v. mounted photographs 27 x 34 cm.

Loose-leaf

Title from spine

Each photograph accompanied by type-written legend, giving description of plant, herbarium specimen number, and negative number

327266-7 v. 1-2."

It is noted as Missing as of 23 Mar. 1977.

Is this the material recently acknowledged (3 April 1980) from Egbert Walker via me? If so, we will obviously have to see to clearing records. If not, you may be interested in knowing there are more Rock photographs (missing).

June 12, 1941

Dr. E. D. Merrill  
Director  
Arnold Arboretum of Harvard University  
Jamaica Plain, Massachusetts

Dear Dr. Merrill:

Just a line to acknowledge receipt of the bound catalogue of Rock's Chinese collections with identifications. I have turned it back to Dr. Walker. We are, of course, greatly obliged to you for having entered additional identifications, which, it is noted, are underscored in red pencil.

Yours very truly

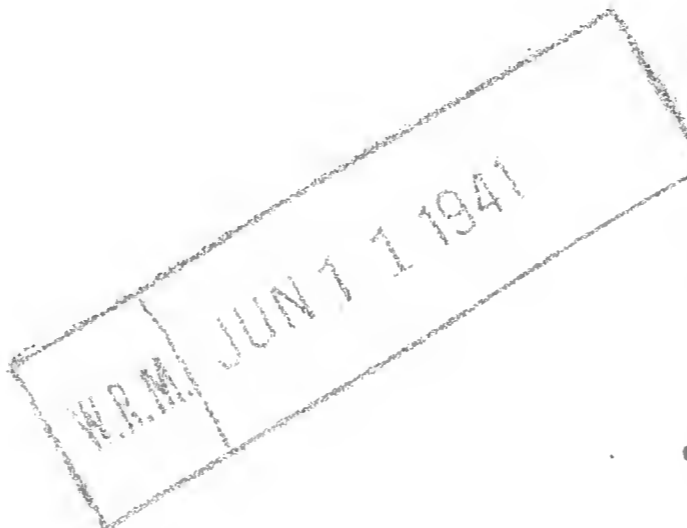

W.R.M. JUN 12 1941

William R. Maxon

Dr. William H. Maxon  
Smithsonian Institution  
Washington, D. C.

Dear Dr. Maxon:

I am forwarding by express prepaid, your bound copy of the list of identifications of the Rock collections that Dr. Walker sent to me on May third. I have transferred identifications both ways, from your list to ours, and from our list to yours, where additions were indicated. All names entered in your copy from our records are underscored with red pencil.

Very truly yours

Dr. W. R. Maxon  
United States National Museum  
Smithsonian Institution  
Washington, D. C.

Dear Dr. Maxon:

The catalogue of the Rock plants mentioned in your letter of May 6 has reached us in good condition. Dr. Merrill will have the necessary transfers made and will return the catalogue in the near future.

With thanks for your kindness in sending this record,

Very sincerely yours,

*A. C. Smith*

Dr. A. C. Smith  
Curator of the Herbarium  
Arnold Arboretum of Harvard University  
Jamaica Plain, Massachusetts

Dear Dr. Smith:

At the request of Dr. Walker there is forwarded  
by express our catalog of the plants collected in south-  
eastern Asia by Joseph F. Rock, December 1921-March 1924.  
Will you please turn this over to Dr. Merrill? It is  
sent at his request, in order that a complete list of the  
identifications may be copied.

*actually,*

Yours very truly

Enclosures

December 17, 1940.

Dr. Herbert L. Mason,  
Curator of the Herbarium,  
University of California,  
Berkeley, Calif.

Dear Dr. Mason:

In June 1939 I sent you a list of the collectors numbers of the undetermined J. F. Rock specimens from China in the U. S. National Herbarium between the numbers 20,000 and 25,000 with a request for their names. You very kindly filled in the names as far as you had them and returned the list. Your assistance was much appreciated. In the course of my curatorial work since that time I have redetermined a number of these specimens and found others cited in literature, and have determined and found cited other specimens not on the list. I am therefore sending you herewith a list of these determinations for your use in curating your collections.

You may recall that some years ago you sent me a list of the undetermined Rock specimens in your herbarium from the first expedition to China, that is with numbers up to 11,000. I filled in some names from the records here and sent you the list. After transferring the names to your specimens you returned the list. As I have now a few more determinations I am again sending you this list. The additions just made are inserted by hand. If you will again return this list to me, I shall see that more names are reported to you when I have another lot. It does not seem feasible to hold this list till all the determinations are made, but rather it seems best to report a few at a time.

If you have any recent determinations or find errors in these determinations being reported, I would greatly appreciate your letting me have them.

Sincerely yours,

Aid, Div. Pl.

UNIVERSITY OF CALIFORNIA

DEPARTMENT OF BOTANY  
BERKELEY, CALIFORNIA

April 29, 1940

Mr. E. H. Walker  
Smithsonian Institution  
United States National Museum  
Washington, D. C.

Dear Mr. Walker:

I am very glad to have the additional determinations on the Rock Collection. These determinations have been recorded and, as you suggested, the original list is being returned to you.

Sincerely,

Herbert L. Mason  
Curator of the Herbarium

HLM:DM  
ENCL.

April 22, 1940.

Dr. H. L. Mason,  
Department of Botany,  
University of California,  
Berkeley, Calif.

Dear Dr. Mason:

Herewith is the list of Rock specimens undetermined at the University of California which you sent me and to which I have added as many names as we have recorded. It appears that not as many Rock specimens have been determined as I anticipated.

I suggest that you record names here given in full and return this list to me. I shall put it with the Rock book and every time a determination is recorded in the book I shall add it also to this list. Then when it seems feasible I shall send it again to you, thus gradually getting your unnamed material labeled up.

Sincerely yours,

[E. H. W.]

Aid, Div. Fl.

UNIVERSITY OF CALIFORNIA

DEPARTMENT OF BOTANY  
BERKELEY, CALIFORNIA

April 16, 1940

Mr. E. H. Walker  
Smithsonian Institution  
United States National Museum  
Washington, D. C.

Dear Mr. Walker:

A list of identifications, mostly by Dr. Rehder, of the Rock collections Nos. 3009-11,744 was sent to the University of California Herbarium in 1934. The numerical sequence was not complete and I presume that only the numbers received by this institution were listed.

From this list we have transcribed all numbers with incomplete or questionable determinations as well as those which are undetermined. I shall be very glad indeed to have the determinations for these numbers and appreciate the trouble you have taken to clear the records.

Sincerely,

Herbert L. Mason  
Curator of the Herbarium

HLM:DM
